Professional Profile

Systems Engineering student concurrently pursuing a degree in Interactive Media Design at ICESI University, with a focus on full-stack development and the ability to work on both the front end and back end of digital products, with over two years of experience in web and mobile development. I have worked as a full-stack developer building interfaces with Next.js and TypeScript, and implementing backend services with NestJS and PostgreSQL in a production environment using agile cycles. I complement my technical profile with experience in UX research, designing and validating conversational flows for a financial chatbot at Banco W in collaboration with ICESI University. I have expertise in relational and non-relational databases (PostgreSQL, MongoDB, Oracle), interface design with Figma, and integrating external APIs. I bring to teams my ability to articulate end-to-end solutions—from the user interface to the business logic—thereby reducing friction between design and development.

Education

Universidad Icesi *February 2028*
Systems Engineering – Interactive Media Design

Study Abroad: *Valencia, Spain*
Universitat de València *September 2025 – February 2026*

Supplementary / Technical or Technology Training
Spring Boot and Angular: Building Full-Stack Applications – Udemy – Currently
Introduction to SQL: Querying and Managing Data – Khan Academy – 2025

Significant Experience

Relevant Projects:
Integrative Project 2 | Gases de Occidente – Developer & UI – March 2026
INNLAB – Full-Stack – September 2026 – Present

Work Experience

Ezmos (Remote)
Full Stack Developer *June 2024 – March 2026*

- I developed web interfaces for an online betting platform using Next.js and TypeScript within agile cycles that included sprints and daily stand-ups.
- I integrated and utilized external APIs for real-time data management, and built backend services using NestJS and PostgreSQL.

Banco W (Cali)
UX Researcher *August 2024 – February 2025*

- I designed and conducted UX research for a WhatsApp chatbot focused on microloans: benchmarks, conversational flows, and user testing.

- I validated usability through real-world user testing, identifying friction points and proposing improvements to the chatbot's flow

Skills and Interests

Technical Skills:

- **Frontend:** HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Angular.
- **Backend:** Node.js, NestJS, Java, Spring Boot.
- **Databases:** PostgreSQL, MongoDB, Supabase, Firebase.
- **Cloud:** AWS, DevOps,
- **Infrastructure:** Docker, Linux, Git, GitHub.
- **Security and Access:** Keycloak, JWT, role-based access.
- **AI:** Claude, GitHub Copilot.
- **Design:** Figma, Adobe Illustrator.
- **Other:** Flutter, PHP.

Personal Skills: Teamwork, effective communication, resilience, flexibility, agility, reliability, attention to detail, empathy, analytical thinking, active learning, systematic thinking.

Languages: English – B2

Interests: Basketball, dancing, video games, cooking.
